1.0 PROJECT OVERVIEW

The Gym Management System is an online platform designed exclusively for administrators to efficiently manage gym memberships. The system allows admins to register new members, capturing details such as full name, date of birth, address, country, and postcode, and sign them up for various types of memberships. Admins can manage membership types, durations, and pricing, and each membership includes a unique membership number, and an expiry date based on gym rules. The system provides detailed membership descriptions and user-friendly forms to guide admins through the registration process.

Additionally, admins can edit member details like username, email, and password. The system notifies admins of upcoming membership expiries, allowing them to renew memberships by updating the renewal date and price. This ensures that memberships are kept up to date and that members can continue to enjoy gym services without interruption.

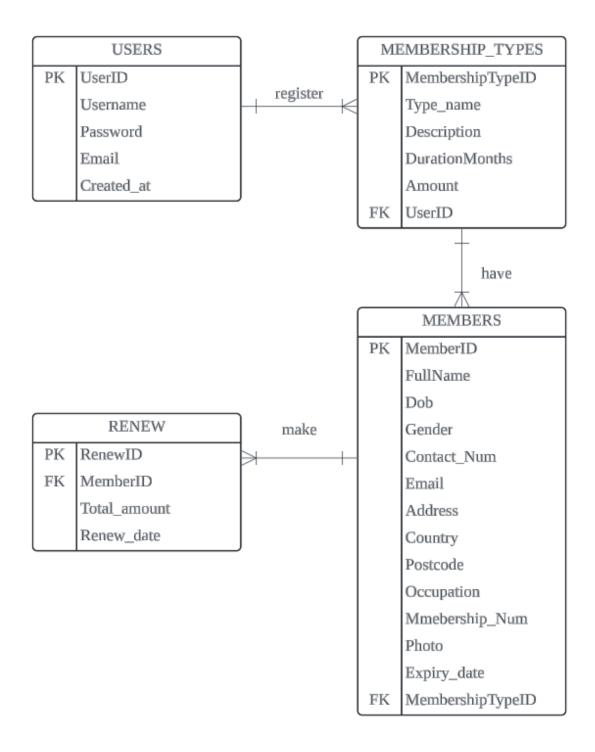

The platform includes a comprehensive navigation menu for ease of use, allowing admins to quickly access different features of the system. Admins can securely log out to end their session, ensuring the security of the system. By integrating these features, the Gym Management System aims to streamline the membership management process, ensuring efficient operations and member satisfaction.

2.0 OBJECTIVE

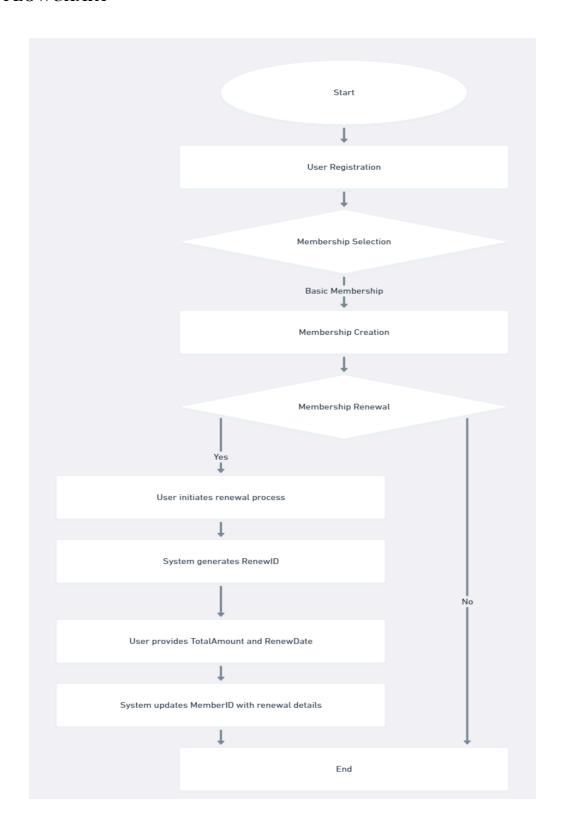

The Gym Management System's objectives are to:

- Streamline Member Registration: Provide a user-friendly platform for administrators to efficiently register new members, capturing all necessary personal details.
- Efficient Membership Management: Allow admins to manage different membership types, durations, and pricing, ensuring accurate and comprehensive membership records.
- Facilitate Membership Renewal: Notify admins of upcoming membership expiries and streamline the renewal process to ensure memberships are updated promptly.
- Enhance Data Accuracy: Ensure all member information, including personal details and membership status, is accurate and up-to-date.
- Improve Administrative Efficiency: Offer intuitive forms, detailed membership descriptions, and easy navigation to help administrators perform their tasks efficiently.
